

MANIFESTO

We ask the Quebec Minister of Education

- that, in the name of respect for every child, regardless of ethnicity, gender, religion, culture, or belief, all forms of ideology be banned from our schools.
- that the indoctrination of our elementary and secondary school students through a curriculum based on an ideology falsely presented as scientific truth cease immediately.
- not to allow any minority group within the Quebec population to impose its ideology on all of our students.
- that, in the name of protecting and serving the best interests of our children, the Ministry immediately institutes a moratorium by removing from elementary and secondary school curricula any content that teaches gender theory as scientific truth.
- to respect parents as the primary educators of their children and remember that they entrust their children to our schools to be educated, not for the school to take the place of parents, particularly with regard to sex education. We demand the right of parents to object to content taught that they do not agree with.
- that the fundamental rights of parents be respected in reality and not just on paper.
- to consider that we are angry, even more since the publication of the report by the Committee of Experts . We have not been heard.

Until the Ministry has instituted a moratorium for the 2025-2026 school year, until parents have been listened to, we, as parents, along with all those who care about the protection of children, will continue to fight, to protest, to remove our children from classes that may harm their physical, psychological, and moral health.

We will never abandon our children.
